

Centralizing Possibilities

AMT Medical, a division of the award-winning contract manufacturing company, provides end-to-end medical device development and manufacturing services for companies worldwide.

“AMT is an experienced and detail-oriented team that understands product development and the compliance-centric medical manufacturing processes. AMT Medical truly offers medical manufacturing ease.”

Supplier Quality Engineer

A Leading Life Science Company

A modern combination of product development, contract manufacturing, and integrated supply chain solutions to meet today's medtech needs.

We apply over 35 years of experience delivering quality and compliant products that help organizations efficiently prototype and/or commercialize medical devices and systems in order to meet today's market demands.

Given our team's experience adhering to the strict standards of IP protection as well as regulatory requirements stipulated by US FDA and European EMA, we can help our customers worry less about compliance and more about their areas of expertise. Furthermore, thanks to our relationship with suppliers across Asia, combined with a streamlined supply chain

process, our customers also benefit from a holistic and efficient manufacturing process that ensures value, protects their business interests, and provides peace-of-mind.

Unique to AMT is our integration of plastic, metal & ceramic injection molding, precision machining and other value-added services and capabilities. This comprehensive combination, paired with expertise in the healthcare market, makes us especially qualified to support medical device production with quick turnaround time, from design to delivery.

Quality Manufacturing

- ISO 13485
- ISO 9001
- ISO 14001
- 21 CFR Part 820 Compliant

Proven Track Record

Over 35 years of
award-winning manufacturing
of medical components
and devices

Medical Expertise

Proven manufacturing
expertise in the applications
of minimally invasive
surgical products and
respiratory medical devices.

"AMT delivers products of the highest quality and meticulously looks into every small detail of the process. The product's packaging was also impressive and pleasurable to the end user."

Chief Operating Officer, Medical Device Company

Our Success Story

Faced with a need to scale production rapidly, during the critical early stages of the pandemic, our partner leveraged AMT's expertise in contract manufacturing and regulatory compliance to meet the urgent need to scale production rapidly.

This successful collaboration not only delivered revolutionary respiratory care devices to healthcare facilities worldwide but also showcased our agility and flexibility in contract manufacturing services.

Supply Chain Management

We understand that having the right expertise and connections gives you the peace-of-mind that you are putting your company on the path towards manufacturing success.

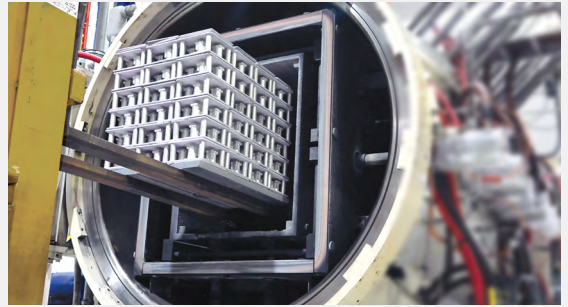

What we can do for you:

- Leverage AMT's vast network of vetted global suppliers, enabling you to cost-effectively manufacture and distribute worldwide.
- Our team ensures that suppliers meet global regulatory standards as well as your company's stringent requirements.
- Our inventory management system guarantees visibility, accountability and eliminates human error from our manufacturing process.

Manufacturing Expertise

AMT promises uncompromising excellence as we navigate the intricate landscape of contract manufacturing.

Our team of engineers apply over 35 years of extensive technical knowledge to create innovative manufacturing solutions to address the pain points of manufacturing in a sophisticated manufacturing environment.

Our expertise includes:

- We create robust and dynamic manufacturing systems, customized to facilitate your requirements, allowing you to focus on developing your product.
- Provide DFM and moldflow simulation (if necessary) on your prototype design to ensure feasibility during mass production.
- Metal injection molding, plastic injection molding and precision engineering technologies.
- Class 100k clean room assembly operations.

Regulatory and Quality Assurance

At AMT, we make product quality our top priority through our comprehensive quality system framework.

Our unparalleled quality and regulatory assurance services allows for easy adoption to various international industry standards.

Our scope includes:

- ISO 13485 and ISO 9001 certified Quality Management System.
- Pre-established Quality Assurance Protocols that ensure all products meet rigorous standards of manufacturing excellence to help you build loyalty in the market.
- Full IQ, OQ and PQ validation process
- Regulatory support, including obtaining local and overseas approval.

We are Committed to Excellence

AMT Medical unlocks the ease of medical manufacturing by bringing together the right components necessary to efficiently deliver safe and quality medical devices globally each and every time.

Compliance

ISO 13485 ensures a product of the utmost quality is delivered each and every time.

Expertise

Our experience in sourcing and assembling medical devices allow us to meet your custom requirements.

Asia-Focused

Our vetted suppliers in Asia enable you to cost-effectively manufacture and distribute worldwide.

Quality

Over 35 years of award-winning manufacturing of medical components and devices.

Flexibility

Our flexible prototyping and manufacturing capabilities enable us to help partners move quickly towards commercialization.

Efficiency

Our centralized supply chain and vertically integrated manufacturing and value added services delivers greater efficiency.
